From the moment you join one of our expeditions along the Pacific Coast, you access all the resources that stem from this shared legacy in exploration, including a veteran team of knowledgeable experts and exclusive programs inspired by our enduring quest for discovery.

The Most Experienced Team

Every member of our staff—from our naturalists, undersea specialists, and expedition leaders to our crew working behind the scenes—is committed to ensuring our guests have an unforgettable experience. Many are veteran guides who have worked with us for decades, chosen for their extensive knowledge of subjects

like geology, history, and wildlife biology. They provide rich context to the cultures and landscapes we encounter.

Travel With Inspiring Guest Speakers

Our Global Voices program features expert guest speakers—including National Geographic Experts—who offer fascinating insights about the places we explore. From accomplished scientists and explorers to renowned authors and world leaders, these inspiring individuals travel alongside us, giving compelling lectures and engaging in lively conversations with our guests. Travelers on the April 7, 2024 departure of our **Columbia & Snake Rivers Journey**, for instance, will be joined by award-winning poet and author Joy Harjo—the 23rd Poet Laureate for the United States and the first Native American to hold the position.

Take Great Photos with the Pros

A Lindblad Expeditions-National Geographic certified photo instructor (CPI) joins each voyage to assist travelers with everything from camera settings to composition. Every guest—from smartphone camera users to advanced hobbyists—can stand side by side with top photographers, pick up tips in the field, and return home with the photos of a lifetime. Inspiring the Next Generation of Explorers

The National Geographic Global Explorers Program fosters the next generation of global stewards through hands-on, educational activities in naturally fun and fascinating places, including Alaska and Baja California. Certified field educators use the natural world as a classroom to help kids hone their observation skills and share their experiences through photographs, videos,

drawings, and more. With a range of activities to choose from, such as identifying whale flukes or earning their Zodiac license, kids can pursue their own interests, whether it's marine biology, geology, or photography.

IGNITE THEIR INNER EXPLORER

Visit expeditions.com/globalexplorers for program details.

Commitment to Conservation

Sustainability is at the heart of our mission, and you can travel with peace of mind, knowing every voyage we sail gives back to the places we explore through the Lindblad Expeditions-National Geographic Fund. Together with our guests, we have contributed nearly \$18 million to protect our oceans, restore marine and coastal habitats, and foster environmental stewardship around the world.

Our U.S.-Flagged Ships The Ideal Base for In-Depth Exploration

The small and nimble ships in the Lindblad Expeditions-National Geographic fleet are designed to provide up-close experiences in the planet's wildest and most remote places. On the Pacific Coast, that means navigating narrow fjords to reach remote, old-growth rainforests; going ashore on uninhabited islands to stroll atop coastal bluffs; and slipping past shifting sandbars to anchor in serene lagoons rich with marine life. Our ships in this region have the additional advantage of being U.S.-flagged, eliminating customs stops in domestic destinations and allowing more time to explore.

Each vessel is stocked with a fleet of Zodiacs that allow us to sail without being dependent on ports or piers, while our kayaks and paddleboards let you glide into inlets to watch sea lions at play or safely observe a bear feeding in a quiet cove. When we're not out exploring, open decks and large windows keep travelers connected to extraordinary views of sapphire seas and the marine life that frequents these waters.

We want your time on board to be as rewarding as your time on shore. Our team of experts—naturalists, cultural experts, and certified photo instructors—will be on

hand, giving compelling lectures and engaging in lively conversations with our guests. Inviting and comfortable public spaces foster a spirited shipboard life, while our sustainable seafood and regional produce program give you a taste of North America's wild bounty.

ALL IN: Activities and excursions are always included in the voyage price.

CHEERS! Enjoy complimentary beer and wine aboard our U.S.-flagged ships.

The U.S. flags on our Alaska fleet allow us to skip lengthy customs stops and head straight into the wilderness, giving you more time to explore.

For guests, our relationships with local food purveyors translate to menus that are unique to each departure, crafted from what is fresh at the very moment they are on the water.

Sourcing at Sea

Local Cuisine on Board

As part of our sustainable food program, Lindblad Expeditions-National Geographic strives to serve locally sourced seafood, meat, and produce wherever we sail—and in fertile places like western North America, there is no shortage of ingredients to draw from. On several voyages in the region, travelers who are curious about the origins of their meals can witness—and even take part in—the farm-to-table process firsthand.

At dinnertime during a voyage through the Pacific Northwest, if you happen to taste an intensely flavorful and garlicky green while enjoying your lamb chop, it's likely locally grown ramps, specially handpicked for your meal. "We identify local vendors who are using sustainable methods to grow the best products in the regions we visit. We have a forager who gathers mushrooms, fiddleheads, and ramps for our **Columbia & Snake Rivers Journey**," says Ana Esteves, Vice President of Hotel Operations for Lindblad Expeditions-National Geographic.

For guests, these relationships with local purveyors translate to menus that are unique to each departure, crafted from what is fresh at the very moment they are on

the water. Culinary experiences also extend beyond mealtime, with travelers often getting the chance to meet foragers and farmers on their own turf. On the 'fruit loop' adventure in Oregon's Hood River Valley, for example, travelers can pick apples and pears from local orchards and taste cider and honey from the adjoining farm stands.

Guests on the **Exploring British Columbia and the San Juan Islands** voyage join ship chefs at Aurora Farms in Washington State to select ingredients for expedition meals. Menus might include dishes like Pacific wild halibut topped with edible flowers and a dulce de leche dessert made with cream from a local San Juan Island farm.

Wine tastings offer a chance to interact with the people creating the coveted bottlings coming from the Pacific Coast. Travelers on **A Southern Migration: From the Channel Islands to Baja California** visit a family-run winery in the Valle de Guadalupe for an inside look at Mexico's up-and-coming wine scene, topped off with a private tasting and lunch.

If you find that you can't part with all the fresh flavors when your trip is over, the good news is that at most stops, you can stock up on delicious souvenirs and bring home a taste of this tantalizing travel region.

Pacific Northwest, British Columbia & Alaska

Ancient rainforests blanket the Pacific Northwest and coastal Alaska, unfurling amid a maze of sparkling inlets and coves where porpoises leap and orca fins flash. Sail these misty seas, or voyage inland, along iconic rivers that wind through dramatic rock canyons and valleys filled with wildflowers and fruit trees.

SHIP ADDED!

To meet demand for this unparalleled experience, *National Geographic Sea Lion* will join her sister ship for the 2024 season. Book early to secure a complimentary overnight hotel stay in beachside Loreto, Mexico.

Anchor overnight among the gray whales of Bahía Magdalena, where mothers and calves relax and play after the longest mammal migration on Earth. Our vessels are perfectly sized to enter the lagoons, and fully equipped for active exploration of the surrounding coastline.

Guests with a California gray whale.

EXPEDITION HIGHLIGHTS

- ▶ Live among gigantic gray whale mothers and their calves in the nursery waters of Bahía Magdalena. See them from the ship, our Zodiacs, and local pangas, delighting in up-close encounters.
- ▶ Kayak and paddleboard stunning mangroves, or beachcomb along endless beaches.
- ▶ Explore diverse landscapes; fat-tire bike along desert island terrain.
- ▶ Scan the skies for bird species, from diving pelicans to magnificent frigatebirds.

**DAY 1: LORETO, MEXICO/
SAN CARLOS/EMBARK**

Upon arrival in Loreto, transfer to San Carlos and embark in the early evening. (D)

**DAY 2: BAHÍA ALMEJAS/REHUSA
CHANNEL/ISLA MAGDALENA**

Make a special stop to view a large frigatebird colony on Isla Santa Margarita (conditions permitting) before making our first whale watching trip of the voyage in the active whale grounds of Bahía Almejas. As we explore via local panga, our team will do whatever it takes to provide you with memorable and meaningful encounters. During lunch, we'll sail toward Isla Magdalena to explore the ever-shifting sand dunes on a cross-island walk to one of the most pristine beaches in the Pacific. Enjoy a barefoot stroll and tally the treasure found on what we affectionately call "sand dollar beach." (B,L,D)

**DAY 3: TRANSIT THE HULL CANAL/
BOCA DE SOLEDAD**

Spend the morning transiting the scenic, winding Hull Canal. Within its narrow channels, bordered by mangroves and sand dunes, and filled with abundant wildlife, we'll hang out on deck with our keen-eyed naturalists to spot species and hear expert commentary. Weather permitting, we'll explore the vast mangrove system via kayak and expedition landing craft. Bird-watching here can be excellent. Among the species we might see

Guests stand-up paddleboarding.

are diving pelicans, wheeling cormorants, terns, great blue herons, ibis, whimbrels, and willets. It's not unusual to see 40 species of birds in just one day along these fertile shorelines. This afternoon, we'll head out to explore the breeding grounds of Boca de Soledad. (B,L,D)

DAYS 4 & 5: BOCA DE SOLEDAD

Each winter, during their long migration, gray whales travel south from their Arctic feeding grounds to breed and give birth to their calves in these sheltered waters. "Grand Central" for California gray whales, we'll spend two full days observing, and with luck, interacting with these majestic creatures. Together with savvy local fishermen we've known for years, we'll venture out in Zodiacs to view the numerous mother-calf pairs that thrive in this region. We'll also have an opportunity to explore the beaches, and if you're feeling up to it, grab one of our fat-tire bikes to roam the seemingly endless beaches. (B,L,D)

**DAY 6: SAN CARLOS/DISEMBARK/
LORETO**

After breakfast, disembark our ship and

transfer to Loreto's city center. Visit the first mission in Baja California, as well as the nearby museum. After lunch, transfer to Loreto Airport for flights home. (B,L)
